Navigating the CorCenCC Crowdsourcing App

The app has four main pages – ‘Recordings’, ‘Profile’, ‘About the Project’ and ‘Settings’ – which can be navigated between using the options on the tab bar at the bottom of the screen, which also has a fifth option for logging out of the app.

You’ll also see this kind of message any time you try to access the ‘Recordings’ page before the you have finished completing your user profile.

Editing your Profile

To edit your user profile, click the ‘Profile’ tab to go to the ‘My Profile’ page. Here you can:

- fill in your name (first and surname),

- select the regions of Wales that have influenced your Welsh,
- select how much of your communication happens in Welsh,
- select from a list of options that describe where you developed your Welsh,

You will need to fill in all of these fields and save your profile before you will be able to go to the ‘My Recordings’ page and start recording your Welsh. There is also an option to tick a box to add yourself to the CorCenCC project mailing list, but this is not compulsory.

After making changes to your profile, click ‘Save Profile’ at the bottom of the page. If you try to go to the ‘Recordings’ page and your user profile is still not complete, you will be notified of the outstanding fields that still need to be completed, and taken to ‘My Profile’ to continue editing.

Making and Uploading Recordings

Clicking on the ‘Recordings’ tab will take you to the ‘My Recordings’ page, which lists all of the recordings that you have made so far. To make a new recording, click on ‘Make a Recording’.

Click on ‘Add Recording’ to go to a page where you can record either audio or video files to include in the recording. You’ll be shown a message asking you to record everybody involved in the conversation stating their names and their consent to being included in the recording – for more information on this, click [here](#). You can use the green slider to choose between recording audio or video, and then click on the red button to start and stop an audio or video recording. You can record as many audio and video files as you like – the consent recording will be clearly labelled as such. Press the black triangle on the left of a recorded file to play it back, or the cross on its right to delete it.

Back on the previous page, you’ll now see ‘X file(s) recorded’ printed under the ‘Add Recording’ button. Before saving your recording, you’ll need to click on ‘+ Additional Information’ to provide some details about the recording, including:

- topic of the recording (one or more tags, separated by commas),
- a setting for the recording,
- who was involved,
- any additional information (optional).

Click on ‘Save Recording’ and you’ll then be prompted to provide a name for the recording. The recording will then be saved and will appear in future on the list on the ‘My Recordings’ page. Recordings in the list can be deleted by sliding left and pressing the red ‘Delete’ button that appears,

although please note that after a recording has been uploaded for inclusion in the final corpus (see below) deletion is *not* possible.

[Uploading your Recording for Inclusion in CorCenCC](#)
